Email paul@basicwelding.co.uk

Original Electrodes have a special profile as they are impedance .
Welders
**Our Electrodes are made to the same exacting standards
As the Original Manufacturer **Guaraunteed****

Eletrodes are not of original Manufacture , Midispot 9000 used for machine identification purposes only .

	wiggewire wiggle wire	50 £29.85
------------------------------------------------------------------------------------	---------------------------------	--------------

	Carbon carbon pencil 10m	QTY
------------------------------------------------------------------------------------	------------------------------------	-----

	Pull Pin 7610 2mm pull pin	QTY
------------------------------------------------------------------------------------	--------------------------------------	-----

	13mm weld Weld on nuts	QTY
------------------------------------------------------------------------------------	---------------------------	-----

	washer 7614 welding washer	50 £6.60
-------------------------------------------------------------------------------------	--------------------------------------	-------------

	washerelect2284 washer elec holder	10 £14.60
-------------------------------------------------------------------------------------	----------------------------------------------	--------------

	stud elec2283 stud electrode	1 £14.60
-------------------------------------------------------------------------------------	---------------------------------	-------------

12D		QTY
12mm domed cap air cooled		10
Single sided electrode cap		

13VN		QTY
13mm gutter electrode		10
NOTE - not to be used in impedance mode		

M100SS		QTY
Single sided Electrode holder		1

Description / code	QTY
Starpull	20
starpulling washer	

Garryblock electrode Cleaner
Cleans the electrode better
than a file

Boronlitt disc	1
mm slitt disc boron	£3.50

Boronball Laserweld grinder ball	1 £30.00
-------------------------------------	-------------

Boron	1
10mm boron mill bit	£42.00
